HOW WOULD YOU ASSESS YOUR GENERAL HEALTH? 0 GOOD 0 FAIR 0 POOR				

To ensure your well being while undergoing treatment in our office, please answer the following questions in detail. All information will be considered confidential and for our records only.

	Yes	No
Are you currently seeing a physician for treatment of a recent or ongoing medical condition?	0	0
Have you been hospitalized within the last year? If yes, explain:	0	0
Have you had a serious illness or operation within the last year? If yes, explain:	0	0
Have you ever had any serious medical trouble Associated with any dental experience? If yes, explain:	0	0
Have you ever been advised to take antibiotics (like penicillin, etc.,) before a dental appointment? If yes, explain:	0	0

Diabetes **yes 0 no 0**
 If yes, do you require insulin?
 Type _____ Dose _____

Artificial joint(s) **yes 0 no 0**
 If yes, which joint(s)

Hepatitis **yes 0 no 0**
 If yes, check type:
 Type A Other
 Type B Non-specific type
 Type C Don't know

Required a blood transfusion
 If yes, when _____

HIV positive
 Have reason to suspect you have been exposed to the HIV virus

Do you now or have you had any of the following cardiovascular diseases? yes 0 no 0

If yes, check any that apply:

CANCELLATION POLICY

ALL DENTAL APPOINTMENTS

The treatment that is planned for you is specific to you. It is important for you to keep the scheduled dates and times to properly complete your treatment. Please keep in mind, **a broken appointment is a loss to three people: you – the patient, another patient who could have benefited from your time slot and the doctor who was fully staffed and prepared for the appointment.**

Therefore, we ask for at least 48 hours advance notice for canceling or rescheduling an appointment; otherwise, a \$125 fee may be assessed to your account per hour of reserved treatment time. Please note, we reserve the right to not schedule further appointments in the event a broken appointment (“no show”) trend begins.

ACKNOWLEDGEMENT, RELEASE AND FINANCIAL POLICY

Insurance

We provide services for our patients with the understanding that they are responsible for payment in accordance with our financial policy. We will prepare and submit insurance forms and reports as a courtesy to assist you in obtaining maximum benefits available. Please note, the dentist's treatment recommendations are not affected by the presence or absence of insurance. Treatment recommendations are based on your dental needs and desires and are not a reflection of your dental benefits. Your dental benefits are a contract between you, your employer and the insurance company, therefore we do not confirm insurance eligibility or predetermine recommended treatment.

Financial Policy (Collections)

All payments, insurance co-payments and deductibles are due in full at time of service. Fees not paid at time of service will result in a \$20.00 administrative surcharge. In the event the balance becomes more than 30 days overdue, billing may be turned over to a collections agency. The responsible party listed below agrees to pay interest, collection costs and other legal expenses related to the collection of fees owed. Waiver of any breach of any time or condition shall not constitute a waiver of any further term of condition.

NOTICE OF PRIVACY PRACTICE SUMMARY

This summary discloses how Healthcare information about you may be used by *Seasons Dental Care*. A full notice of your privacy rights has been provided to you.

Treatment, Payment, Operations. We may use health information about you for treatment, to obtain payment for treatment, for administrative purposes and to evaluate the quality of care that you receive.

Uses and Disclosures for Appointment Reminders. We may use and disclose your Healthcare information to contact you as a reminder that you have an appointment at the office.

Authorization for Use and Disclosure. We will not disclose your information to others unless you tell us to do so, or unless the law authorizes or requires us to do so.

Public health, research, health and safety, government, works compensation. We may disclose your information for public health activities, research, health and safety, governmental function, and in order to comply with workers compensation laws and regulations.

Rights. You have a right to inspect and copy information used to make decisions about your care, to request an amendment of the information, to an accounting of disclosures, to request communication with you by alternate means, to request restrictions on the information we use, and to revoke your authorization for release of information.

Organization duties. We must maintain the privacy of protected health information, provide you with notice of our legal duties and privacy practice with respect to your health information, abide by the terms of the notice, notify you if we are unable to agree to the requested restriction on how your information is used or disclosed, accommodate reasonable requests you may make to communicate with health information by alternative means or by alternative locations, and obtain your written authorization to use or disclose your health information for reasons other than those listed above and permitted under law.

"I acknowledge that I have received the full Privacy Notice."

GENERAL RESTORATIVE INFORMED CONSENT

Facts You Need To Know

“Quality is never an accident, it is always the result of high intention, sincere effort, intelligent direction, and skillful execution; it represents the wise choice of many alternatives.”

TOOTH DECAY: Some individuals are more prone to tooth decay than others. With a highly refined carbohydrate diet or inadequate home care, tooth decay may occur on areas of the tooth or root not covered by a dental crown. If the decay is discovered at an early stage, it can often be filled without remaking the crown or fixed bridge. Long delays in treatment, a loose provisional, or permanent crowns and bridges can result in additional decay, the “death” of a tooth nerve, which would require a root canal or even the loss of a tooth and/or teeth.

POTENTIAL PROBLEMS WITH FIXED PROSTHODONTICS: Crowns and fixed bridges are used to treat problems of decay, severely worn or fractured teeth, malocclusion, and to protect teeth that have had root canal treatment. However, because dental restorations are replacements for natural teeth, potential problems do exist. Below, are brief descriptions of the most commonly encountered problems. Questions about your specific case are encouraged.

PROVISIONAL (Temporary) RESTORATIONS: Provisional crowns and fixed bridges are used to protect the teeth and to provide a satisfactory appearance while the new permanent crown(s) and fixed bridge(s) are being fabricated. A provisional restoration is usually made of acrylic resin, which is not as strong as the final porcelain/metal restoration. A provisional is attached to the teeth with temporary cement; therefore, it is important to minimize the chewing pressure on a provisional restoration since it can fracture and/or become dislodged. If this does occur, call our office as soon as possible for repair or recementation. Waiting more than a couple days can create unnecessary problems, and may delay your treatment.

PORCELAIN FRACTURES: Porcelain is the most suitable material for the esthetic replacement of tooth enamel. Because porcelain is a “glass-like” substance, it can break. However, the strength of dental porcelain is similar to dental enamel, and the force necessary to fracture dental porcelain would usually fracture natural tooth enamel. Small porcelain fractures can possibly be repaired; larger fractures often require a new crown or fixed bridge.

LOOSE CROWN or LOOSE FIXED BRIDGE: A dental crown or fixed bridge may separate from the tooth if the cement is lost or if the tooth fractures beneath it. Sometimes loose crowns and fixed bridges can be recemented, but teeth that have extensive recurrent decay or fractures will usually require a new crown or new fixed bridge.

EXCESSIVE WEAR: Sometimes crowns and fixed bridges are used to restore badly worn teeth. If the natural teeth were worn from clenching and grinding the teeth (bruxism), the new crowns and fixed bridges may be subjected to the same wear. In general, dental porcelain and metal alloys wear at a slower rate than tooth enamel. However, excessive wear of the crowns or fixed bridges may necessitate an acrylic resin mouth guard (also called a protective occlusal splint or night guard.)

ESTHETIC CONSIDERATIONS: It is our intent to use our technical and artistic capabilities to achieve your esthetic expectations and to incorporate these factors into your final dental restorations. You are asked to communicate your desires, and our best efforts will be applied toward incorporating your wishes in harmony with the functional and physiological requirements of the restorations. After your approval, the restorations will be finalized. Please note that only very MINOR changes to the *shape* of the restorations can be made after finalization. NO changes to color can be made after finalization.

Some changes in appearance may be beyond the capabilities of restorative and prosthetic dentistry. A consultation with other dental or medical specialists may be suggested.

STAINS and COLOR CHANGES: All dental restorative materials can stain. The amount of stain generally depends on oral hygiene as well as the consumption of coffee, tea, tobacco, and some types of foods or medicines. Dental porcelain usually stains less than natural tooth enamel, and the stain can be removed at dental hygiene cleaning appointments. Natural teeth tend to darken with time more so than porcelain crowns. At the time a new dental porcelain crown or fixed bridge is placed, it may be an excellent color match with the adjacent natural teeth. Over time, however, this may change and bleaching or other appropriate treatment may be suggested.

BLEACHING: Bleaching provides a conservative method of lightening teeth. There is no way to predict to what extent a tooth will lighten. In a few instances, teeth may be resistant to the bleaching process, and other treatment alternatives may be advised. Infrequently, side effects such as tooth hypersensitivity and gum tissue irritation may be experienced. If these symptoms occur, consult Dr. Pontikes.

IMPLANTS: Longevity depends on many factors – the patient’s health, the use of tobacco, alcohol, drugs, sugar, oral hygiene, the amount of quality bone, surgical compromises, the degree of biting force, etc. As with any restorative procedure, the potential exists for the fracture of an implant component, implant crown, or loss of the implant from the bone.

ADDITIONAL INFORMATION: Sometimes when teeth are prepared for crowns, due to the extent of wear, deep decay, large fillings or old crowns, the additional “trauma” to an already compromised tooth can possibly cause the nerve of the tooth to die. This usually requires root canal therapy. Depending on the complexity of the tooth roots, you may be referred to an endodontist (a specialist who does root canal treatment). It does not normally require changes in your treatment plan.

MAINTENANCE: Even the most beautiful restorations can be compromised by gum problems, recurring cavities and poor oral hygiene habits. Part of our commitment to you is to provide you with the proper information to keep your gums and teeth (natural or restored) in good health. Professional cleaning by a dentist or dental hygienist at recommended intervals keeps your mouth healthy and can intercept potential problems early enough to avoid additional restorative work or unnecessary discomfort. It is also important to maintain a professional cleaning schedule throughout the course of your dental treatment.

INFORMED CONSENT

Patient’s Name _____ **Date** _____

I certify that I have read and understand all of this INFORMED CONSENT which outlines the general treatment considerations as well as the potential problems and complications of dental treatment. I understand that potential complications and problems may include, but are not limited, to those described in this document. I have been given the opportunity to ask questions about the proposed treatment and the risks, as well as the potential consequences should I elect to postpone or refuse treatment. I understand that during and following treatment, conditions may arise that warrant additional or alternative treatment. I further understand that no guarantees can be made for a successful result.

Recognizing the potential problems and risks of treatment, authorization is given for dental treatment to be rendered by the dentist and office staff. In addition, I grant permission for photographs taken by Dr. Pontikes, or photographs released from other healthcare practitioners, of the procedures to be used for educational and teaching purposes only.
